Bound for Aden!

The choice of a 'plane to operate from Aden presented the Hallal Shipping Co., with many problems. It must have full marks for reliability—to travel over some of the World's worst flying country. Its cabin ventilating system must be proof equally against scorching heat and bitterly cold nights. And naturally it has to have all the latest safety devices, all the luxury, that the modern air traveller expects.

The Hallal Shipping Co., find their problem solved by the Monospar. It gives them exactly what they want—at the price they wish to pay.
